

IAN BENNEDICK L. RETUTA

Metro Manila, Philippines | 09388950368 | ianbennedick10@gmail.com | <https://www.linkedin.com/in/ianzzkieee/>

SKILLS

- **Programming Languages:** : Java, Python, and C++
 - **Web Development:** HTML, CSS, JavaScript, Bootstrap, Node.js, Docker, MySQL, WAMP
 - **Methodologies:** Agile Scrum and Waterfall
 - **Tools & Version Control:** IntelliJ IDEA, VSCode, Canva, Figma, Google Docs, Google Sheets, Microsoft Office, Google Colab, SceneBuilder, Replit, OpenRouter
 - **AI & Data Science:** NLP, RAG, LDA Topic Modeling, Transformer Models, Model Evaluation
 - **Soft Skills:** Problem-Solving, Collaboration, Adaptability, Communication, Resilience, User-Centric Mindset
-

WORK EXPERIENCE

NOAH Business Applications - SLU Internship 2025

- Performed system testing for CDCD environment modules.
- Tested and documented BRSS test scripts to verify system functionality.
- Conducted API testing and prepared documentation for ledger report validation.

ACADEMIC PROJECTS

Legal Literacy Adaptive Routing Framework for Filipino Migrant Workers 2026

- Developed a Legal NLP and RAG-based framework for simplifying Hong Kong labor law information for Filipino migrant workers.
- Built and evaluated modules for triage, semantic routing, legal retrieval, and safety auditing using accuracy, precision, recall, and F1-score.
- Applied LDA topic modeling and Human-in-the-Loop validation to improve legal relevance, safety, and reliability.

RAG-Enhanced Chatbot for Event Management SMEs 2025

- Developed a research-based AI chatbot solution for Event Management SMEs using lightweight transformer models and RAG integration.
- Compared T5, BART, GPT-2, and Qwen 2.5 using ROUGE-L, BLEU, METEOR, and BERTScore.
- Contributed to data cleaning, dataset augmentation, model evaluation, and the development of EaseAI, a web-based RAG-enhanced chatbot prototype.

SLU information Web Application Project 2024

- Assisted in the making of a school-related chatbot to enhance the accessibility of students in school-related information using Agile principles
- Designed using HTML and CSS, Java, Bootstrap, API integration, SQL and Node.js

World Plaza Tower Terminal Project 2024

- Led the successful implementation of a high-performance, one of the 27th storey network infrastructure of a corporate office in BGC
- Applied Agile principles in designing the most recommended scalable network architecture
- Implemented an Advanced Security Protocols and developed a 3D-Modeled Server by utilizing Cisco Packet Tracer for Simulation and Optimization and AutoCAD for rendering
- Conducted Risk and Safety Assessments & integrated smart building features

Gig Ticketing and Management System Application Project 2024

- Assisted as an UI/UX Designer on User Interface side and Database Architect
 - Designed and developed using HTML and CSS, Java and SQL
-

EDUCATION

Bachelor of Science in Computer Science 2021 - 2026

Saint Louis University - School of Accountancy, Management, Computing, and Information Studies

- Dean's Lister, First Year (2021-2022)
